

ENGINE

ENhanced Geothermal Innovative Network for Europe

Announcement Workshop 2 Exploring high temperature reservoirs: new challenges for geothermal energy

*Volterra (Tuscany), Italy
1 - 4 April 2007
organized by CNR-IGG*

Thematic sessions

- Signatures of high temperature condition
- Modelling and reservoir simulation of high temperature systems
- Supercritical fluids: a new frontier for geothermal

Each session will be introduced by invited speaker(s), followed by poster presentations and plenty of time for discussion.

Please find detailed information, online abstract submission and registration forms at <http://engine.brgm.fr> following the link *conferences&workshops*.
